

# A powerful investment platform for digital assets

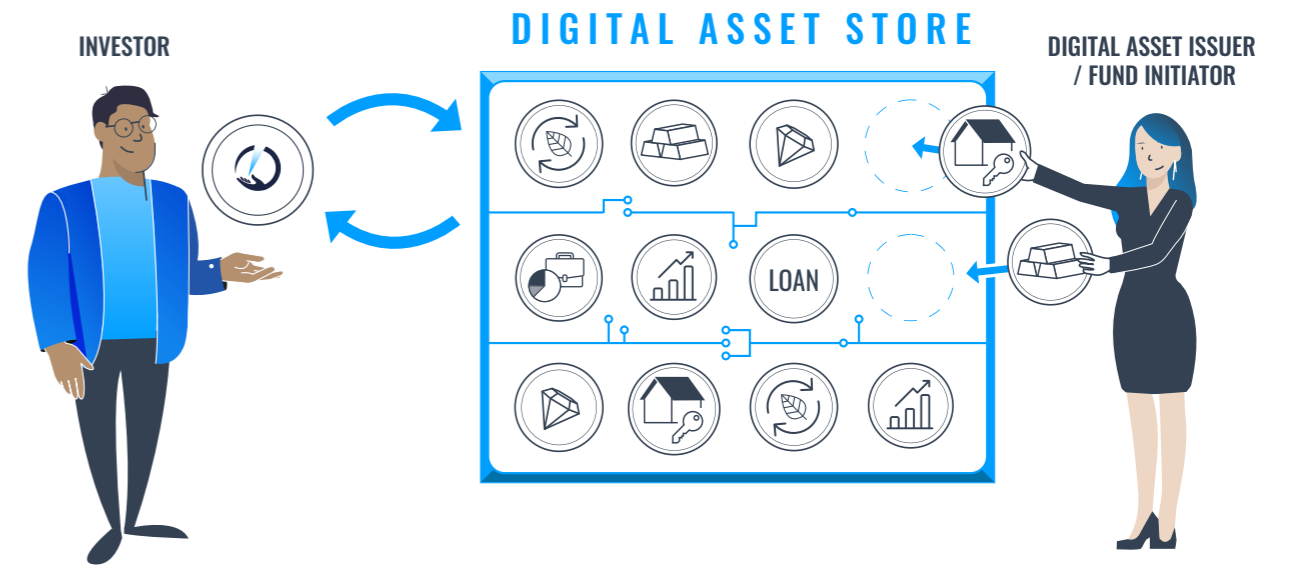

# Digital End-to-end Investment Process

Enlyte covers the full investor's journey, from onboarding to transaction, to administration and reporting. It is one of the first platforms to support regulatory approved digital assets.

We simplify and accelerate the process by removing the middle man, all parties can follow the same processes from their own perspective.

Enlyte provides investors access to nonfungible investments such as real estate or commodities through smart contract powered tokenization.

## Vision

- ✓ End-to-end digital platform covering the full investor's journey
- ✓ Efficient and secure investment process by leveraging on Blockchain and AI
- ✓ Simple, secure and fully digital client onboarding
- ✓ Digital assets issuance, administration and servicing
- ✓ New investor services based on advanced analytics
- ✓ One of the first platforms to offer regulatory approved digital assets
- ✓ Ecosystem with trusted and established partners

simple

secure

efficient
